HOW IT WORKS

Depending on the application in question, the solenoids will operate some form of mechanical device to move the product (fruit, flowers, bottles, letters, clothes etc) into another location. This allows the users’ products to be sorted.

OUR EXPERIENCE

For more than 30 years, Penny+Giles has worked with a number of major clients around the world to supply standard and custom solenoid solutions for the Sorting Machine markets that demand high quality, reliable products at a cost-effective price.

FEATURES

- Huge variety of applications
- High speed/long life often required
- Normally uses standard open frame solenoids
- Capable of ten million operations
- Many voltages available
- Encapsulated coils and bearings assist longer life
- More than 30 years experience in this industry
