

# Arens Controls

## Multi-function Vehicle Console

Agricultural and Construction Equipment

Multi-function Vehicle Consoles are specifically designed for a wide array of vehicle functions brought to a central console for operator convenience and efficiency. The example shown to the right is for a Harvester Combine with throttle control, Combine Thresher Head controls as well as lights and other system controls. Working closely with the Vehicle OEM, Curtiss-Wright engineers develop complete console assemblies that easily install into Agricultural and Construction equipment while making the operator's tasks much easier to perform, improving efficiency and safety while reducing ergonomic pressures.

Each console is a unique design custom built for the vehicle it serves. This flexibility gives the Vehicle OEMs unprecedented control over vehicle functions as well as location and position for levers and displays. By combining all of these features into a single assembly, Curtiss-Wright helps Vehicle OEMs streamline their manufacturing process and final assembly of their agricultural and construction vehicles.

### SPECIFICATIONS

#### ELECTRICAL

OPERATING VOLTAGE	12 or 24Vdc
CONNECTORS	Selected by Vehicle OEM

#### MECHANICAL

MAIN BODY PANEL	Molded Polycarbonate
VIDEO SCREEN	Optional
JOYSTICK LEVER INTERFACE	Optional
MOUNTING POINTS	4 Minimum 12 Maximum
ELECTRICAL SWITCHES	Push Button Rocker Switch
LABELING AND DECAL	Custom Custom based on Vehicle OEM Design

## AGRICULTURAL APPLICATIONS

## CONSTRUCTION & OFF-HIGHWAY APPLICATIONS
